

Liners & Suspension

Alpha® Upper Extremity Liner

At last, the comfort of the Alpha Liner is now available for upper extremity amputees! Ohio Willow Wood has adapted its revolutionary lower extremity Alpha Liners for use by above elbow and below elbow amputees.

The Alpha Upper Extremity Liner surrounds the residual limb in a layer of skin-friendly, mineral-oil-based gel that contains Vitamin E. Made from thermoplastic elastomer (**not silicone or urethane!**), the gel gently adheres to the skin to protect against abrasion and breakdown. The Alpha gel is covered in a layer of durable fabric that extends the life of the liner and allows it to easily slide into a socket.

In order to provide maximum comfort and excellent socket fit, the Alpha Upper Extremity Liner is available in 3 mm gel thickness as well as three sizes to adapt to the amputee's limb circumference. The unique oval-shaped umbrella allows for a more comfortable fitting liner on upper extremity patients. Like the lower extremity liners, the Alpha Upper Extremity Liner is heat moldable, allowing prosthetists to easily tailor the liner's fit within their facilities.

- **Made of Comfortable Alpha Thermoplastic Elastomeric Gel**
- **For Above Elbow and Below Elbow Amputees**
- **Available in Locking Style**
- **Uniquely-Shaped Umbrella for Upper Extremity Amputees**

SPECIFICATIONS

STYLES	Uniform
COLORS	Buff
THICKNESS	3 mm
SIZES	Small, Medium, Medium Plus
U.S. L-CODE SUGGESTIONS	L-6692

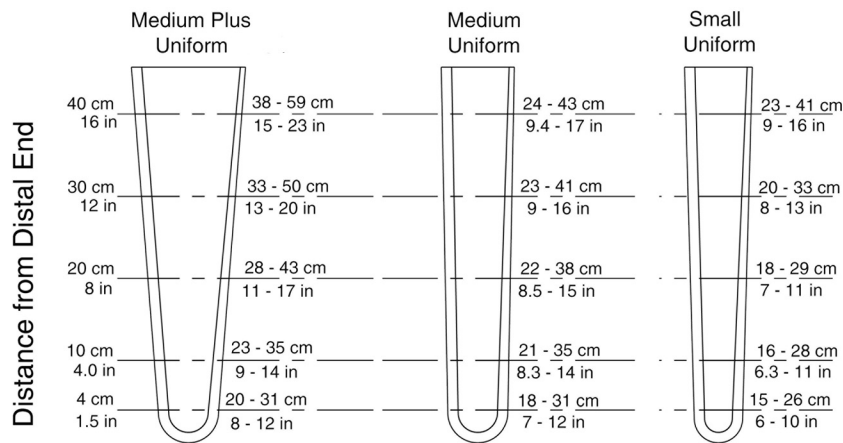

For locking liners, Ohio Willow Wood strongly recommends applying Loc-Tite Removable Threadlocker 242 (or equivalent) to the pin threads prior to installing the pin. Failure to ensure that the locking pin is secure in the Locking Liner could result in the pin coming out of the liner, resulting in the potential for injury to the amputee.
