Magnum Heavy Duty Foot

Nothing Stands the Pressure Better

Ohio Willow Wood offers the Magnum Heavy Duty Foot and Magnum Heavy Duty System for amputees weighing up to 350 pounds (160 kg). Both the Magnum System and the Magnum Foot have proven to be very durable and reliable, while providing excellent response for amputees. Backed by extensive laboratory testing prior to its introduction, the Magnum Heavy Duty System, designed for transtibial amputees, has proven to far exceed the strict testing standards set by ISO 10328. Numerous amputees wore the Heavy Duty components as part of our extensive in-house field testing program and its years on the market have been successful as well. The foot and system are both remarkably lightweight, and the slim design and lifelike cosmesis offer a more pleasing appearance. The foot is now available separately or as part of three different endoskeletal kits.

- **Moderate to High Activity (U.S. Levels 3 & 4)**
- **350 lb Weight Limit**
- **Proven Durability Through Laboratory and Field Testing**
- **Lightweight, Sleek Design**
