## Earthwalk™ 2 Ankle

The Earthwalk 2 Ankle is an innovative multiaxial ankle, geared toward amputees (U.S. Activity Levels 1 and 2) who are looking for more stability and less dynamic response. The “late stop” feature allows for easy roll over so the foot can maintain foot flat longer. With the Earthwalk 2 Ankle, amputees enjoy the freedom of movement through inversion and eversion, internal and external rotation, and plantar and dorsiflexion. Weighing only 185 grams the Earthwalk 2 Ankle is lighter than the original Earthwalk Ankle and lighter than many other ankles on the market. Its new, more durable design makes adjustments to the foot easier since the ankle is sleeker and taller. Four different ankle stiffness options are available. ISO and field testing have proven it to be maintenance and noise-free. For exceptional performance, use the Earthwalk 2 Ankle in combination with the Earthwalk 2 Foot. This combination provides outstanding durability and energy return at a great price! The Earthwalk 2 Ankle carries a weight limit of 250 lbs (115 kg).

Product No.	Description
EWA2-R	Earthwalk™ 2 Ankle, Stiffness code Red
EWA2-B	Earthwalk™ 2 Ankle, Stiffness code Blue
EWA2-Y	Earthwalk™ 2 Ankle, Stiffness code Yellow
EWA2-G	Earthwalk™ 2 Ankle, Stiffness code Green

- **U.S. Activity Levels 1 & 2**
- **Multiaxial Ankle with Natural Motion**
- **Lighter than the original Earthwalk™ Ankle**
- **Proven to be Noise and Maintenance Free**
- **4 Ankle Stiffnesses**
- **Use with the Earthwalk™ Foot for Exceptional Performance**
