

Foam Blanks

- Unique foam makeup will not change shape during the high temperatures and pressures created during lamination and vacuum processes.
- Exceptional foam has more dimensional stability over a wider range of operating temperatures.
- Distinctive foam composition has a 90% closed cell structure resulting in no voids or air pockets in the foam.
- Innovative figure-8, mandreling system eliminates the need to change mandrels at different stages of the manufacturing process
- Foam blanks work with all types of carvers, especially with the OMEGA Carver.
